What we're doing

Alstom Transport, maintenance contractor for Transdev Sydney (operators of the Inner West Light Rail), is undertaking track maintenance on the L1 Dulwich Hill Line from Wentworth Park to Rozelle Bay.

To improve service reliability and reduce the need for ongoing maintenance activity, we're working on:

- Ballast excavation, using heavy track machinery.
- Track maintenance, including sleeper spacing adjustments and guard rail joint works.

How this affects you

Noise and light pollution

- These works may create additional noise at night.
- Work will take place continuously from 11.30pm to 4.30am each night.
- Work parties will aim to minimise noise impacts by reducing vehicle idling and/or movements, and where possible use radio communications instead of vehicle reversing alarms.
- Equipment may be delivered to the worksite outside of this time. Due to travel restrictions on large vehicles, some of these deliveries may need to take place at night.
- Sparks may be generated during guard rail joint works. Strict fire and safety controls will be in place.
- Light pollution will be minimised by work parties directing lights away from properties.
- The NSW Environmental Protection Authority has been notified of these planned works.

Traffic and parking

- Heavy vehicles will deliver and collect equipment from the worksite in the days prior to, and after the works are completed.
- Access to the rail corridor will be via gates in Railway Street, Glebe and Brennan Street, Lilyfield.
- While we will park our vehicles inside the rail corridor wherever possible, please be aware that on-street parking may be limited near worksites.

We apologise for any inconvenience and thank you for your cooperation and patience during these essential works.
