

# Light rail

## Electrical Generator at Wentworth Park Stop

From Wednesday 28 April to Thursday 29 April 2021

### What is happening

Transdev Sydney, operators of the Sydney Light Rail, will be impacted by the Ausgrid electrical outage at the Wentworth Park light rail stop 3am Wednesday 28 April. You may have been previously advised of this outage via letter notification from Ausgrid.

To allow for the continual and safe operation of the light rail services through Wentworth Park, an electrical generator will be installed at 3am Wednesday 28 April to supply electrical power to the light rail stop whilst the power outage is in force. The generator will be in place for 24 hours.

### How this affects you

#### Noise impact

- The generator will be petrol powered and therefore there will be a slight increase in the ambient noise level during the night. We apologise for the inconvenience this may cause.
- **The generator will be on continuously from 3am Wednesday 28 April to 3am Thursday 29 April.**

We are not expecting the noise to be excessive and we appreciate your support to ensure the safe operation of the Sydney Light Rail whilst we are impacted by the electrical outage.
